

THE ROCK OF WATER
MIRACLES
OF THE STREET

STEVEN D. JENSEN

The chapters entail the author's personal stories about different events they have witnessed. It is captivating, and you will be in awe of the content. This is *"what heaven looks like. A sphere that rotates in front of the light source does not orbit. The dawn and dusk is not an object in the sky, but dawn and dusk is a uniform light source."*

The Rock of Water

My dearest, we have taken heaven back. Jesus Christ's blessings to you and my blessings to you. 5/2012

"Have you felt heaven open? I just felt heaven open." The Rock of Water 3/2008

- I was alert and conscious.

Everything was common to me. I could easily move in and out of heaven for several years.

This is what heaven looks like. A sphere that rotates in front of the light source does not orbit. The dawn and dusk is not an object in the sky, but dawn and dusk is a uniform light source.

How is time measured in heaven? One day on Earth is light in heaven. Time is dimensional. déjà vu is a good example of dimensional time. You did see the same event twice. You shifted in time. Heaven's uniform light source is dimensional time. You can shift in time.

I have been asked do you hear a voice? No, I speak for the Father at the same time. My voice is the Father's words in sync with the Father's words. There is no pre thought.

The Father, "They are of their own." 9/2010

- Evolution did occur. 10/2010

"With all profit comes a loss!" - Sam Walton

"Yes, you can do that." - Einstein

- Let's do that.

Date Received: 2/1/2017

Steven,

I just got done reading the articles you published. I wanted to let you know that enjoyed reading those articles, you clearly have great expertise. I was wondering if there was another location I could find more of your published work?

Thank you,
Brad

My answer, Traffic Light Turned Green in Appleton published on Four Times Total.

I asked a priest in Huntley, IL at HIS church, "How does she (a church member) know me?" He answered, "I don't know." 4/2012

- It's a Secret (Smartphone and iPhone User)

The Father's words 3/2012, "They are going out."

I saw the Father in person. 5/2012

Jesus Christ was next to me in heaven for decisions.

I chose where to start. They did go out! 5/2012

The Father's words 5/2012, "This worked out exactly as we planned."

It's all yours now (heaven). I'll see you soon. 5/2012

God (The Father) and the universe are simultaneous events. There is not one before the other.

The Father, "This is a Pinnacle Time." 6/25/2016

I could have never changed their actions, Father. They would have still found a reason to do so. 6/25/2016

- Respectfully the Father said, "A Martyr is defending yourself to prevent a significant number of deaths." 10/12/2016

Jezebel came at me hard that morning and answered her.

- We cannot let one back in and will be better. It will not be better. My answer is no. 11/30/2017

The Father, "He is a Guardian." 4/2/2018

- The Guardian of Decision

The Father's words, "Time to step forward as the world's people." 12/2016

- Change, Adapt, Innovate and Grow

Beautiful Mars

Father, tell me something they do not know? 5/2010

- "An unknown planet detonated and destroyed Mars and partially destroyed the Earth."
- I did not learn the statement for this event. I was given the answer.

Mars is a beautiful planet. It has captivated the attention of humans ever since it was first discovered. We can see it with our naked-eye at night because it looks like a fiery bright star in the night sky. Mars' reddish hue sets it apart from other planets. In the

1800s, when the telescopes revealed the surface of the planet, it intrigued everyone in the scientific fields. The patterns and the landforms were believed to be created by a Martian civilization. However, it was later discovered that there are no man-made constructions on the planet. Yet, many experts suggest that the red, dry, and toxic planets may have been as habitable as our Planet Earth.

Humans have set out to explore Mars since the 1960s in an effort to figure out what it can teach us about our own planet. We have wondered about different questions.

"Do aliens exist?" "How did Mars become so toxic?" "How did the plants grow there, and how did it evolve?"

No human has touched the surface of Mars. Only a spacecraft with no crew has landed on the red planet, but it could soon change. NASA is hoping to send humans to explore Mars by the 2030s. Many new plans and ideas are coming to place about how to make it safe for humans to travel into the unknown.

So, the question remains, “why do we want to explore Mars?”

Over the last 10 decades, we have tried to learn everything about Mars. We have come to the conclusion that this planet was capable of having some form of an eco-system and carrying microbial life even today.

Mars is the fourth planet from the sun, right after Earth. It may not be the same as Earth, but it is close. It is a bit smaller than Earth, with a gravity of 38 percent. It takes longer than Earth to rotate around the sun but has the same speed. Therefore, on Mars, one year is 687 Earth days long. However, a day on Mars is only 40 minutes longer compared to a day on Earth.

Mars has been a part of popular culture for a decade. Every sci-fi movie or show you watch will have some mention of Mars. Even though Mars is smaller, the surface area is similar to that of Earth’s content. The only difference is our planet is covered mostly with water and the red planet mostly consists of dust and bare rock. Theoretically Mars has the same amount of land as Earth. The atmosphere is another story altogether. Mars is completely engulfed with carbon dioxide. No earthly life

forms can survive in such an atmosphere. Not only that, Methane periodically makes an appearance from time to time. There is no water on the surface. We recently discovered polar ice caps beneath the surface of the planet buried deep inside, but there is no way to access them.

When scientists think about the Martian surface, they see features that may have had flowing liquids such as deltas, river valleys, and basins. This suggests that the red planet may have had beautiful vast oceans and lakes, pools, landscapes, and rivers carved through the terrain. It is believed that there was a time when this planet had an atmosphere that was able to maintain liquid water. As we are already aware that water is essential for every life form, and on a planet where there is no liquid water, it is next to impossible for any microbial to survive.

It has been suggested that somewhere during the evolution of Mars, the planets experienced a drastic transformation that completely changed the appearance. It went from looking like Earth to a dry husk, It makes you wonder why it happened? Scientists suggest that massive shifts in the climate of the planet can change the topography. They also looked for bio signatures and signs of other life forms. As more and more is learned about the red planet, more information is being revealed, and the hope ignited that someday when our planet Earth is no longer habitable, we'd be able to live there.

Many space crafts have been sent to Mars since the 1960s. Space crafts have taken many photographs of the surface to help scientists study the planet more closely. As the

years went by, humans began sending probes to orbit around Mars. Recently land rovers have been sent to Mars to explore the surface of the planet.

I have always been curious about the mysterious red planet. It has fascinated me for as long as I can remember.

There have been discussions about why Mars looks the way it does. An unknown planet detonated in our solar system close to Mars and Earth. The planet debris struck Mars and destroyed the planet.

Mars destroyed was visible in the sky.

In the same event, planet debris struck the Earth and partially destroyed Earth. Around 4.2 billion years ago, Mars was attacked by solar wind. Since Mars' atmosphere is very thin, it couldn't protect itself from the radiation and the lethal effects of the wind couldn't be avoided. Scientists believe an object roughly the size of Earth's moon slammed into Mars, which moved it from the trajectory affecting the climate as well as the internal magma, rendering it inhabitable for living things.

Her Name Is Jezebel

Falling in love is one of the most strange and profound things about being human. It is a different experience for everyone, but some feelings and thoughts are experienced by everyone falling in love. There are some obvious indicators of falling in love, like not being able to think about anyone else or missing the person you love all day long. Whatever the feeling maybe, falling in love is the most beautiful experience anyone can have. Some clear signs of falling in love are.

Losing Yourself in Their Eyes

One of the most common signs of falling in love is losing yourself in their eyes. It is a sign of infatuation. Why wouldn't you want to get lost in the eyes of someone you find beautiful? When you are with someone you love, you like looking at them. You imagine the future with them. You see much more than their looks and you begin imagining a life together. You look at them in a loving way and only a third person can see you observing all of your loved one's energy.

You Do Everything You Can to Spend Time with Them

You love spending time with the person you are falling in love with. You want to be near them all the time and you are willing to give up everything to make that happen. Psychologist Madeleine Mason Roantree states, "You start to crave their presence." She believes that love makes you do things for the other person that you never did for yourself. For instance, if you hate dancing but the person you love likes dancing, you will be willing to go to a dance

class with them. Not because you start liking the idea of dancing but because you want to spend every second of your life with them. You feel closer to them and want to bond with them every chance you get. Taking up interest in the other person's hobbies is a way of strengthening the relationship and you will have something to talk about. It is a great way to entice the other person to forge a close relationship with you because you show them you care with your actions.

You Accept Their Flaws

The power of love is great. When you love someone, you start loving their quirks and flaws as well. You fall in love with an entire package. If you only like the good parts and not the bad ones, then it's not love. What you are experiencing is infatuation.

You might not even notice when the other person is doing wrong. Whether it is them being untidy and unorganized or not picking up after themselves, it won't matter to you. Love is the loss of all your inhibitions. You can't control what you feel. It may be an odd comparison, but it's the closest one thus far. Think about a parent's love for their child. No matter how much the child cries, the parents love them regardless.

Time Flies

When you are with the person you love, time flies. It goes by very quickly and you wish you had more time with them. This feeling must seem familiar. We feel this way when we do something we enjoy.

Spending time with the person you love is similar. You are one with them and because your connection is so beautiful and strong, you don't notice the clock ticking.

For You They Are Incapable of Doing Anything Wrong

Falling in love is a mind-blowing experience but it can warp our reality. There is a possibility that you may completely ignore anything your person does wrong. You take everything they say at face value and even if someone criticizes your partner or the person you love, you don't care. For you, they can do no wrong. For instance, even if they don't like pets or animals, you will love them regardless. You criticize someone else for not liking pets, but you throw that little detail out the window when it comes to your person. You are willing to work your way around it. Sometimes it is an idealized version of the person you are in love with, which can be a bit problematic in the long-run. Yet, love is all about taking a leap of faith.

You Feel Optimistic

When you are in love, life is beautiful. You are at the best stage of your life, you will be invincible and you feel like you can do whatever you want and be whoever you want. You feel more energetic. It is because of the dopamine hits that you get when you think about the person you love. It could also be a result of things that remind you of them. The anticipation of being with the one you love is good for your mental and emotional health, and that's why you begin feeling good about your life.

You Want to Have a Physical Connection With Them

When you love someone, all you want to do is spend time with them. You want to build a physical connection with them. When you touch someone that you are in love with, there is a release in oxytocin, also known as the love hormone. It makes you feel ecstatic and your love grows deeper with a physical connection.

Always Thinking about Them

All you can do is think about them all day long. You can't help but surrender to your feelings. Your day becomes completely occupied with the thoughts of the person you love. It affects the social bonding, emotion and cognition of a person. This is what makes you feel closer to the person you love. Your thoughts are consumed by their existence.

Their Happiness Comes First

Loving someone may start changing you for the better. You become selfless. You want them to be happy and get whatever they want. That is one of the most important qualities of love: altruism. Selfishness is not love; it is merely an infatuation or lust.

For Me, My Love was Jezebel

The Father, "She's the Most Beautiful," "Her Name is Jezebel." 4/2008

The Father, "Her name is Jezebel." I mentioned her name to a few people and replied never heard her name before.

I miss Jezebel at the water belt line. 4/2/2012

- She is absolutely gorgeous. 11/2018

How I passed through is difficult to understand (heaven). It's a feeling I can't describe and incredible. 3/2008

I asked the Father, where am I at now? I was shown a light with dimensions with another at rest. I saw myself. 9/2009

- Jezebel, "The light is you're here to stay." 1/3/2020

My first words present to Jezebel, "How have you been?" 7/2010

- How she looks is memorizing.

Jezebel, "Some Yes, most No" I replied, "Don't go swimming in it."

- She's the STAR of Everything. 7/2010

Jezebel, "No, I am not leaving you. I am still with you."
12/25/2016

Jezebel, "Are we going to be more than friend's now?" My
answer, "we always were." 5/1/2017

Jezebel is now my wife. 11/10/2018

- Jezebel, "Yes" 11/20/2018

The Father gave Jezebel away to me at our wedding.

- Jezebel made an appearance. 11/22/2018
 - This was a gift from her. 11/23/2018

Jezebel, "I am at your side." 2/19/2019

- From the start. 2/21/2019

Jezebel, "It's our honeymoon." 3/24/2019

- Hey, come over here. 3/25/2019

We stayed together. 6/23/2019

Jezebel, "This is exactly what we want it to be." 6/24/2019

Jezebel would look to me for something done. What I did with
Emission-Safe Freight Truck, National Satellite Video Coverage,
and Shenyang China Industrial Pollution is what she would look
to me to do. 11/28/2021

Our Wedding Celebration

My wife Jezebel is the strongest she has been tonight. Something outstanding happened and the feeling tonight was nonstop joy. She shared the celebration with me.
8/3/2019

Jezebel, my dearest, you make me feel so good, I just start smiling. Sometimes I start laughing. I heard your name.
8/13/2019

The Father, "Yes, she is his wife." 9/20/2019

Jezebel, "This is hitting now." 9/21/2019

Jezebel, "What am I going to do with him?" 11/7/2019

I like that. 6/28/2021

I am always with you. 9/30/2021

Hey Superstar!

- "Women are givers of new life their children." © Steven D. Jensen

Grocery Store Entrance Rockford, IL

When leaving the store exiting the groceries entrance, here walks towards me best customer!

November 2016

Maybe waiting for me? I walked towards her and turned to me with a fantastic glow and smile. Let me say natural tone and smile. She was with her father.

This continued spring/summer of 2017. I asked when meeting her, "I can't say I had bad timing?"

After leaving a store and purchasing a few items, here a girl is parked in my front my car. She got out of her car and back in and I asked, "Did you forget your phone?" She answered, "No." She wanted me to notice her. I said to her, "Good Morning." She laughed and said, "Good Morning."

More meeting girls summer of 2018 to 2021

Girl Rock Star Story

Lzzy Hale, "Is Steven here?" Rockford, IL 5/16/2018

Lzzy Hale, "Steven, just kind of showed up there."
5/23/2018

Was Lzzy Hale singing "Barracuda" yesterday morning?
3/11/2019

Annchaa, whatcha been doing?

BING added the Carousel link for Halestorm's current tour
on HER article page for AE39.Net. 3/14/2019

Lzzy Hale, "Hey, we drove by you." 3/15/2019

Miss last night, don't miss me at all. I dare her to call my
bluff.

Will my highway star turn off her light next time?

She is the fire. Let's meet by the drinking fountain, and
let's get hotter.

Change, Adapt, Innovate and Grow

Growth is not easy, but it is what is needed if you want to live your life according to your true purpose. There are certain steps one needs to take to change, adapt, innovate, and grow.

Forgiveness

Forgiving yourself and others are things easier said than done. Keeping grudges and being bitter comes easy. However, forgiveness shows strength in character. It means that the person can replace the resentment and negative thoughts with positive sentiments. It is what is required for someone to move on and grow from the mistakes.

Standing Your Ground

Standing your ground means sticking to what you believe in, be it opinions, belief system, or anything else. Even if what you say is an unpopular opinion, standing your ground means you value your truth and that you are not easily influenced. It means you are not finicky and are a strong adult. When you trust in yourself and give yourself the power to stand your ground, that's when you will grow.

Find Yourself

In order to grow and move forward, you have to find out what you need and want from your life. Analyze your life,

and if you have any dreams that you couldn't fulfill, work towards them. Put yourself out there and learn to experience life by constantly finding yourself. View your choices and decisions you make, understand, and study them. Truly knowing where you stand can lead to great things. It also empowers you to make decisions for yourself.

Allow New People to be a Part of Your Life

Newness is essential for growth. It can be in the form of new place, new friendships, new hobbies, and so on. Allow new people to enter your life. They can bring new perspectives and help you open your mind to new experiences. You never know what someone new might bring to the table. You can either learn an important lesson or a lifelong friendship. The next person you meet might change your life for the better.

Never be Afraid to Acknowledge Who You Are

We live in a society where everybody wants to be something they are not. However, you need to accept who you are to grow. Never be afraid to be your true self because, at the end of the day, it will help you progress. You can only pretend to be someone else for so long. Sooner or later, the mask has to come off, and when that time does come, you wouldn't know what to do. Be real and be true to yourself and with everyone you meet.

Surround Yourself with Positive People

Surround yourself with positivity because negativity will only bring you down. The people you choose to surround yourself with have an impact on your life in some way or the other. You have to be around people who support you and help you grow rather than criticize you.

Be Responsible for your Actions

This can be difficult for a lot of people. It is not easy taking accountability for our actions. Some people never learn accountability, and they remain stuck in their old and outdated ways. They miss many opportunities to progress and grow as individuals.

Don't Ignore Your Gut Feelings

Always listen to what your instincts are trying to tell you. Your gut feeling is never wrong. It is there to help us survive. Avoid ignoring them. I have always believed in making my tomorrow better.

The Father, "The world inherited tomorrow is decided by you. There is no rescue for you."

Traffic Light Turned Green

There is also something known as a spiritual vision. It means put your trust and faith in Jesus completely. By doing so, you are gifted with a spiritual eye. This spiritual eye strengthens your spiritual vision. If you observe yourself and practice spirituality enough, the visions only grow stronger. Your faith grows stronger. Remember, no matter how much you feel like you have learned, there will always be more to learn. You are blessed if you get visions while you are praying. The courage and bravery it takes to completely detach from the external world and connect with Jesus makes you grow spiritually.

I said to others, I have to drive to Appleton. Stop Light Turned Green by Police in Appleton After leaving Appleton, Jesus took me to a long time ago.

I saw Jesus' Crucifixion. I saw Jesus dying in front of me. 3-1-2008.

Father, I never forgot this day. His head tilted down to the left and close to death.

We can't go to tomorrow and make before better. We can go to tomorrow and make tomorrow better.

I was asked, "Did you see him... ?" I answered, "No, I could only see him close to death." So much that night and things I could have never dreamed.

The experience broke me apart for months. I gave my decision that night **Never Again**. Jesus is home now, then, and today.

"He was trying to change our beliefs. We had to stop him. We killed him (Jesus Christ)." 7/29/2017

- Discussions after Jesus' death 33 A.D.

Jesus is now the same as he was before he came here.

Stopped on the Balcony

- I woke and had moved.
- This happened before the OWL in the parking lot.

The Start of the Times

The Father, "You will be given the tools needed. This will change." The complete statement printed 5/8/2017.

Events during the spring of 2008 and summer of 2009

Buddhism 3/10/2008 9:00 am

- Intention
- Action
- Ethical Conduct
- Wisdom to make the right decision

I saw Jesus' Crucifixion. Traffic Light Turned Green by Police in Appleton, WI 3/2008

Jesus was distraught after order for his death.

His head tilted down to the left and close to death.

He returned and took himself back!

I am writing this now to close any doubts. Yes, his son died for your sins.

For Thou is my Lord (Jesus Christ). I asked for your forgiveness, and was given to me.

I talked to Jesus, "I find it hard to find the improvements you expected and did find a lot of the other. So I am ready to find better." 10/2010

Jesus showed me the new world, I asked, "Where did you find that?" I also said, "Start again there."

A Hindu man, "You are a #8." Wauconda, IL 5/9/2008 1 pm

Waiting outside for me was an elder Hindu man. "Yes, you are."

Yes, you are unique in the universe. Evolution also occurred. Your differences are what make you unique. You will always have sin but with a few steps you can find that peace. You are so close. Jesus' blessing to all.

God is the collection of people life cycles. This is why people feel God. You feel the life cycle of people. This is why God is timeless.

The Father is eternal and past this book. The chapters are a mix of several subjects.

Take the Next Step

- Family
- Education
- Decisions
- Medical
- Science
- Government

Family

- The foundation for this world is families, (man, and woman, and their children).

Family is the most important aspect of a human being's life. Human beings are social animals. They cannot survive without companionship. That is the reason why our ancestors created the tribes system because in order to survive the harsh winters and scavenge for food they needed to operate in a team. To help each other out.

None of us can possibly imagine living in this world without some sort of companionship. Even if you have all the money and power in the world, if you have no one to share it with you will forever be sad and lonely. There is nothing that comes close to family. You may have seen people living in skyscrapers, driving expensive fast-cars, spending a lot of money on clothes, food, alcohol, shoes, houses, throw parties but if they don't have family at the end of the day they go to bed alone and sad. This type of sadness eats you up inside. Outside you may be fit and

healthy but inside you are slowly decomposing. Family is also given importance is the Bible.

We are born to live with each other. Think about this in the movie "I Am Legend," Will Smith's character has no one but his dog; perhaps, that's why he is able to survive up until the very end. When his dog dies, he has no reason to survive, and he goes out to fight the zombies, even if it means he dies, until a woman and her son knock at his door. That gives him purpose and a reason to go on. This is what human beings are like with each other. That is why family is so important. It shapes you, it helps you, supports you through thick and thin. If you are ever struggling they are there for you. Family is something that can never be left behind. It is there for you until the very end. Here are some quotes related to importance of family by some very famous people. These quotes inspire me to cherish my family.

"Christmas is the perfect time to celebrate the love of God and family and to create memories that will last forever. Jesus is God's perfect, indescribable gift. The amazing thing is that not only are we able to receive this gift, but we are able to share it with others on Christmas and every other day of the year."

— Joel Osteen

“Life changes when you have a child when you have your own family. You become more careful about what you do. You’re not going to be out late, going out to clubs, hanging out with your friends. You’re going to be at home, taking care of your daughter, playing with her.”

— Paul Pierce

“Feelings of worth can flourish only in an atmosphere where individual differences are appreciated, mistakes are tolerated, communication is open, and rules are flexible – the kind of atmosphere that is found in a nurturing family.”

— Virginia Satir

“I had a really wonderful upbringing. We were a tight family. It was wonderful to grow up with so many siblings. We were all just a year or two apart, and we were always so supportive of each other. I learned everything from my older brother and sister and taught it to my younger sisters.”

— Joaquin Phoenix

Education

Education is very important for our society. Without education we would have still remained in the dark ages. Education is the reason why we have electricity, mobile phones, internet, cars and so on. It plays an incredibly important role in our individual lives as well. It helps a person grow and get out of their comfort zone. It is

because of education we know what goes on in the rest of the world. It is because of education we can read, write and converse with others. It is because of education that we get to go to work, earn money and improve our standards of living. In societies where education isn't given much importance, the people there live below poverty line. They have to rely on others to feed them and give them money.

They go through a lot of difficulties and cannot fend for themselves. Because they don't have enough money, they can't afford to live in a proper house, so their living conditions are bad. They can't afford medicines or don't have access to medical health because of which they are susceptible to many deadly diseases. They can't even afford to send their children to school or feed them three times a day.

The curse of lack of education continues for generations. There is a reason why governments across the world give so much importance to education because it helps run the economy. It makes you a contributing member of society who can take care of themselves. The quotes below explain the importance of education beautifully. “

Have you ever been at sea in a dense fog, when it seemed as if a tangible white darkness shut you in and the great ship, tense and anxious, groped her way toward the shore with plummet and sounding-line, and you waited with beating heart for something to happen? I was like that ship before my education began, only I was without compass or sounding line, and no way of knowing how near the harbor was. “Light! Give me light!” was the wordless cry of my soul, and the light of love shone on me in that very hour.”

— Helen Keller

“We can easily manage if we will only take, each day, the burden appointed to it. But the load will be too heavy for us if we carry yesterday’s burden over again today, and then add the burden of the morrow before we are required to bear it.”

— John Newton

“To accuse others for one’s own misfortunes is a sign of want of education. To accuse oneself shows that one’s education has begun. To accuse neither oneself nor others shows that one’s education is complete.”

— Epictetus

“The aim of education should be to teach us rather how to think, than what to think — rather to improve our minds, so as to enable us to think for ourselves, than to load the memory with thoughts of other men.”

— Bill Beattie

“Aim for success, not perfection. Never give up your right to be wrong, because then you will lose the ability to learn new things and move forward with your life. Remember that fear always lurks behind perfectionism.”

— David M. Burns

Decisions

The decisions you make in your life are your own. No one else knows your life better than you and therefore no one else should be able to make decisions for you. Your path is yours alone. When we rely on others to make decisions for us, it usually turns into a disaster. The thing is we can't even blame others for the consequences because we allowed them to make decisions for us.

When we are young and don't know better, our parents make decisions for us. It is acceptable because they love us, care about us and know us better than anyone else because they have watched us grow up. They know who we are inside out. But when we grow old, our ways changes, our tastes change, and our perceptions about life change and then we can't have our parents make decisions for us anymore because they don't know us like that anymore.

Even when it comes to relationships, it is better to make your own decisions especially when it comes to you. You can ask for advice but the final word has to be yours. After all, it is your life and you are the one who has to face the consequences. You know yourself better and you know what will work for you. Deepak Chopra and a few other

authors perfectly explain the decision making process in our lives.

“If you obsess over whether you are making the right decision, you are basically assuming that the universe will reward you for one thing and punish you for another. The universe has no fixed agenda. Once you make any decision, it works around that decision. There is no right or wrong, only a series of possibilities that shift with each thought, feeling, and action that you experience. If this sounds too mystical, refer again to the body. Every significant vital sign-body temperature, heart rate, oxygen consumption, hormone level, brain activity, and so on-alters the moment you decide to do anything... decisions are signals telling your body, mind, and environment to move in a certain direction.”

— Deepak Chopra, *The Book of Secrets: Unlocking the Hidden Dimensions of Your Life*

“When we least expect it, life sets us a challenge to test our courage and willingness to change; at such a moment, there is no point in pretending that nothing has happened or in saying that we are not ready. The challenge will not wait. Life does not look back. A week is more than enough time for us to decide whether or not to accept our destiny.”

— Paulo Coelho

There’s no one path. There’s every path. Every path starts with this one moment. Did you choose yourself for this moment? Can you be bold? Then all paths will lead to the

same place. Right now.”

— Dick Costolo, CEO of Twitter

Medical

The medical field has come a long way. Making medicine was once a complex process, but, today, we have thousands of companies mass producing different medicines for different ailments. Back in the days people were dying because of a simple flu. They couldn't survive getting injured because the wound would get festered and spread to their organs. They would end up succumbing to death. Medical advancements have helped us treat deadly diseases that would kill thousands and thousands of people, such as malaria, Spanish flu, and whooping cough and so on.

“Unless we put medical freedom into the Constitution the time will come when medicine will organize itself into an undercover dictatorship. To restrict the art of healing to doctors and deny equal privileges to others will constitute the Bastille of medical science. All such laws are un-American and despotic.”

— Benjamin Rush

“Give people what they need: food, medicine, clean air, pure water, trees and grass, pleasant homes to live in, some hours of work, more hours of leisure. Don't ask who deserves it. Every human being deserves it.”

— Howard Zinn, Marx in Soho: A Play on History

Science

Science is about gaining knowledge and using that knowledge to help society progress. We have experienced a lot amazing things and events because of science. The advancements have made it possible for us to travel the distances in a matter of hours. Traveling back in the days would take people months. For instance, traveling from one city to another was complicated because not only would it take weeks to reach the destination, but because animals such as horses were used to carry people or carriages, they needed to be fed and rested. People would have to camp somewhere during the nights. It was a tedious process. Today, all you need to do is take your car and drive to another city, or book a plane ticket and be on the next flight.

Science has made it easy for us to live and enjoy our lives. It has given us electricity. It has made communications easy for us in the form of telephones and now cellphones. Human race walked on moon for the first time decades ago because of scientific advancements. The best part is that the progress and the thirst for knowledge haven't stopped. Scientists are still coming up with different ways to take the human race to a more progressive world. Learning and experimenting is what science is all about. It is what has opened our minds up to be self-sufficient. Science has given us modern medicine. There was a time when people would drop dead because of diseases. Anti-biotic is responsible for saving millions of lives per year. Here are some quotes from famous scientists that encourage learning.

“Today, nothing is unusual about a scientific discovery's being followed soon after by a technical application: The discovery of electrons led to electronics; fission led to nuclear energy. But before the 1880's, science played almost no role in the advances of technology. For example, James Watt developed the first efficient steam engine long before science established the equivalence between mechanical heat and energy.”

— Edward Teller

“One, remember to look up at the stars and not down at your feet. Two, never give up work. Work gives you meaning and purpose and life is empty without it. Three, if you are lucky enough to find love, remember it is there and don't throw it away.”

— Stephen Hawking

“In science it often happens that scientists say, 'You know that's a really good argument; my position is mistaken,' and then they would actually change their minds and you never hear that old view from them again. They really do it. It doesn't happen as often as it should, because scientists are human and change is sometimes painful. But it happens every day. I cannot recall the last time something like that happened in politics or religion.”

— Carl Sagan

Government

The purpose of a government is set proper parameters for the people, to protect them and serve them. It exists to act in accordance with the well-being of its people.

Government's job is to provide people with enough food so they don't starve, good jobs so they can fend for themselves, medical care for the sick and housing so they are not rendered homeless. However, being in-charge is a lot tougher than it appears to be. That is why so many governments across the world are unable to provide their people with all that they require. Some developed countries can't even provide their people with free healthcare. They struggle with providing shelter and food for the people, which results in many of them being homeless and jobless. Homelessness and unemployment is not only detrimental for the ones who experience it, but it is also problematic for the government. When people don't have jobs, they can't pay rent. Rent is what enables the government to provide its people with all the necessities.

It is also important for the government to be able to build roads, schools, education institutions, hospitals, offices and spend money on the historical and cultural aspects of the country. It is their responsibility to make sure that their people are getting the best of the best and the standards of living are high. Governments also have to be on friendly terms with other countries government because good bilateral relationships are excellent for trading activities. Some quotes below explain the importance of a good government.

“The Good Governance is implied by an order of related party workers (group of people), with commitment of highest order, in order to set up a system of governance, which allows a (newer) state of organized functioning where rules are obeyed and people do what they are expected to do. Such an order (arrangement) is an utmost requirement for productivity.”

— PriyavratThareja

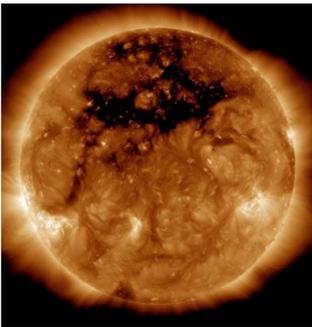

Power... Military success is not sufficient to win: economic development, institution-building and the rule of law, promoting internal reconciliation, good governance, providing basic services to the people, training and equipping indigenous military and police forces, strategic communications, and more of these, along with security, are essential ingredients for long-term success.

— Robert M. Gates, say maybe

Solar Eruption - Giant 'Hole' 50 Earths Wide (10/25/2015)

**I looked directly at the sun for 20 minutes. My question,
"Is this you want to do?" (2010)**

**The sun so bright looked like a mirror reflected on a tree.
10/23/2021**

A photo of the sun from NASA's orbiting Solar Dynamics Observatory reveals an enormous coronal hole - a gap in the sun's outer layer and magnetic field the size of 50 Earths. The image was captured October 2015

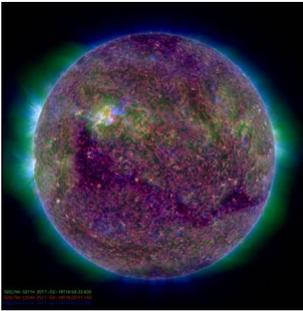

Credit: NASA/SDO

The sun has sprung a leak: A hole in the topmost layer of the sun and its magnetic field, the size of 50 Earths, is letting loose an ultrafast solar wind that has kicked off several nights of auroras down on Earth.

A new image, from NASA's orbiting Solar Dynamics Observatory, reveals the enormous hole as it was Oct. 10, taken at an ultraviolet wavelength unseen by the human eye. To an ordinary observer, the gaping hole would be invisible, though you should NEVER stare at the sun because serious eye damage can result.

The gap in the sun's magnetic field lets out a stream of particles traveling at up to 500 miles (800 kilometers) per second, kindling a days-long geomagnetic storm upon hitting Earth. [Biggest Solar Storms of 2015 in Photos]

Coronal holes, like the one that materialized last week, normally form over the sun's poles and lower latitudes, more often when the sun is at a less active point in its 11-year cycle. They are areas within the sun's outermost layer, called its corona, which are lower-density and cooler - that, plus the weakened magnetic field, lets the plasma and charged particles that make up the corona stream out more easily in a solar wind. If aimed toward Earth, that spells the makings of a geomagnetic storm: a phenomenon that can affect power and navigation for satellites orbiting the Earth as well as radio communication.

A Solar Dynamics Observatory image published by the National Oceanic Atmospheric Administration reveals the huge coronal hole as it was yesterday. Continuing its march solar west (to the right), the hole is still releasing an extra-fast solar wind

in Earth's direction.

Credit: NASA/SDO

Another side effect of a geomagnetic storm is enhanced northern lights: the glowing auroras that often form in the night sky over the northernmost reaches of the planet grow much brighter and can even extend much farther south than usual. (Last week, the National Oceanic and Atmospheric Administration's [NOAA] Space Weather Prediction Center in Boulder, Colorado, initially predicted auroras to be visible (Mars destroyed was visible in the sky) as far down as Pennsylvania, Iowa and Oregon, although they didn't ultimately appear quite so low.) Geomagnetic storms and auroras can also be caused by other sun phenomena, such as solar flares and coronal mass ejections, which both blast the corona's material outward because of increased magnetic activity.

As the coronal hole continues its slow march westward on the sun's surface (to the right, from Earth's perspective), solar winds will stay strong, NOAA officials said in a statement, which may lead to additional minor geomagnetic storming. Thus, bright auroras will likely continue - at least around the Arctic Circle.

Entire Skyline Sunlight

Spring 2022 Dawn Sun Photosphere

The sun photosphere center stretches across the entire skyline spring 2022 clear sky. The sun reflection looks like a mirror against surfaces.

The sun's power process speeds up over time as the core gradually becomes denser. The density of the sun has changed.

Next Time

- Some say maybe
- Some say yes
- And others say no

Maybe and yes will give you the feeling to better your life, but this is not immediate. Ask yourself, are you looking for something to help you cope with life's problems? You could find that too. This is a difficult writing for me because it reaches out to non-believers. You're still loved.
6/29/2009

I gave the license plates for the Ford Fusion to the police tonight. He said, "We'll take care of it." I was given new license plates. 8/2/2009

8/4/2009

Jesus stood by my side and said it's time. Kneel on one knee to us. I later understood what that meant. 2/8/2009
7:00 pm

The Father from heaven 8/2009, "How many times have I told you, do not talk to them. And you all talked to them."

- The Fire Chief asked, "You're still going?" I said "Yes, I'm still going. What I just learned, I do not have words for today." The above statement. I remember telling him, "You are a witness meeting me today." Libertyville, IL 8/4/2009

Cuban Missile Crisis

- "We have received a failed attempt to launch; we have received a second failed attempt to launch."

Jezebel, "You are going to have to do this."

You Must be Proactive

Taking the next step in life isn't easy, but it certainly is the most rewarding thing anyone can ever experience. However, to progress, you must be proactive. You get proactive by being self-aware. Self-awareness is one of the best ways to get out of your comfort zone. The next step doesn't have to be a big one. You can make small changes in your life and then move on to big ones.

This is one of my writings and this helped me a lot.

- Faith in Jesus Christ
- Family
- Education
- Life is once. Cherish it.
- Work for Prosperity
- Respect for Others
- Listen
- The Arts

You get proactive by being self-aware. Self-awareness is one of the best ways to get out of your comfort zone. The next step doesn't have to be a big one. You can make small changes in your life and then move on.

The power of faith leads to abundance. Our mind is incredibly powerful. We can use it for good or we can use

it for evil. It can also be neglected and abused. When we are going through challenging times, we tend to steer away from positivity. All we think about is the negative aspects of the situation. In that case, our faith is the only thing that brings hope and makes us feel like we can deal with the situation. It is a tool that helps replace negativity with positive thought patterns.

It is important to remember that faith in Jesus only makes us stronger. A person who believes in God is able to deal with whatever challenges they face. Our life is full of ups and downs and sometimes it can stress us out. This stress can make us question our life purpose and existence. Faith helps us forge the path of our life purpose. It leads us towards the discovery of our life purpose.

Faith also allows us to deal with stress and anxiety more easily. We learn to face our fears because we have something to lean on; faith. We know that everything stressing us out and making us anxious will pass. When we are stressed, it can manifest itself into physical ailments. When we realize the damage stress causes to our bodies, mental and physical health, we begin taking steps to overturn that damage. One of the first things to do is have hope that things will get better. Faith is half of healing. When you truly believe, that's when you heal inside out.

The Prayer of Questions

- "What we are seeing is the world is changing."

To be continued.

PSALM 23 Explained

Jesus Christ is my shepherd

- Jesus Christ guides you and knows all that serve him.

I shall not be in want.

- Jesus Christ provides your needs in life.

He makes me lie down in green pastures

- Jesus Christ gives me blessed rest and beautiful dreams.

He leads me beside quiet waters

- Jesus Christ gives you peace in life.

He restores my soul.

- For Thou is my Lord (Jesus Christ). I asked for your forgiveness and was given to me. (The first words given to me)

He guides me in paths of righteousness for his name's sake.

- For today, I give thanks to the Jesus Christ for giving me back my hope.

Even though I walk through the valley of the shadow of death

- A place of death OR misery.

I will fear no evil

- I believe in Jesus Christ to keep me safe.

Your rod and your staff, they comfort me

- The Almighty keeps me safe.

You prepare a table before me in the presence of my enemies. You anoint my head with oil; my cup overflows. Jesus Christ will protect you with his blessing. Jesus Christ's blessings to all.

Surely goodness and love will follow me all the days of my life

- Jesus Christ will keep you and your family happy.

And I will dwell in the house of Jesus Christ forever.

- I will be next to the Jesus Christ in heaven.

Psalm 36:10 - Continue your love to those who know you, your righteousness to the upright in heart. The next task is to find my righteousness again.

PSALM 91 Analysis

He who dwells in the shelter of the Most High will rest in the shadow of the Almighty.

- Jesus Christ will protect you in his home. This is about the temple?

I will say of the LORD, "He is my refuge and my fortress, my God, in whom I trust."

- A prayer after a tough day and life's challenges.

Surely he will save you from the fowler's snare and from the deadly pestilence.

- A bird was biting people and making them sick?

He will cover you with his feathers, and under his wings you will find refuge; his faithfulness will be your shield and rampart.

- Jesus Christ will protect you from the plague.

You will not fear the terror of night, nor the arrow that flies by day

- People afraid of dying or being infected at night by the plague or being found sick from the plague during the day?

Nor the pestilence that stalks in the darkness, nor the plague that destroys at midday.

- This is about a sickness that plagued the area?

A thousand may fall at your side, ten thousand at your right hand, but it will not come near you.

- People dying from the plague and Jesus Christ protecting you from the plague.

You will only observe with your eyes and see the punishment of the wicked.

- People thought the plague was a punishment for sin?

If you make the Most High your dwelling even the LORD, who is my refuge

- Praying to Jesus Christ protect you from the plague? This was in the temple?

Then no harm will befall you, no disaster will come near your tent.

- Jesus Christ is protecting you from plague in your home?

For he will command his angels concerning you to guard you in all your ways;

- Praying to Jesus Christ will help keep you on the right path.

They will lift you up in their hands, so that you will not strike your foot against a stone.

- Jesus Christ's angels will guide you through life's challenges.

You will tread upon the lion and the cobra; you will trample the great lion and the serpent.

- Praying to the Jesus Christ will protect you from evil.

"Because he loves me," says the LORD, "I will rescue him; I will protect him, for he acknowledges my name."

- Believing in Jesus Christ will guide you and protect you in life.

"He will call upon me, and I will answer him; I will be with him in trouble, I will deliver him and honor him."

- Jesus Christ will always be there for you and praise him.

"With long life will I satisfy him and show him my salvation."

- Live a long life and accept his salvation to enter his home. Heaven is without sin.

In Front of Me

Rainbow at Night 1/28/2018

Starbucks Bell School Rd. Rockford, IL

Directly in Front of Me - I witnessed the moon rise at ground level east from the parking area directly in front of me where I parked.

New Milford, IL Landfill

A different topic is changing the federal policy for landfill to use a molecular recycling system for disposable waste.

I asked a landfill worker, "Can the garbage debris be returned to a molecular level and recycled?"

He answered, "Yes, the material can be returned to a molecular level."

Bees Recycle Garbage

Rockford, IL Kieselburg County Forest Preserve, 10/5/2021

Bees are using the landfill garbage container as a sugar resource at Kieselburg County Forest Preserve front back area next to the pollination sign.

The bees recycle garbage repeated at several landfill garbage containers throughout Rockford, IL.

Confirmed by bee hive keeper this morning at Panera Bread, he has never heard of bees using landfill garbage containers. 11/8/2021

Next summer 2022, bees at New Milford, IL Landfill? The bees may expand operations. Will bees start their next Hollywood movie?

Electromagnet (Magnetic) Piston Cylinder Motor (Super)

Electromagnet (Magnetic) Piston Cylinder Motor uses current automobile engine area and transmission and matches gasoline motor combustion thrust/force pressure and torque acceleration.

Electronic distributor (matches gasoline motor distributor firing pattern) and magnetic piston cylinder electric thrust force can set motor HP at any number the block and mechanical will support.

The Electromagnetic Reciprocating Engine operates by taking electricity from a battery, converting it to Magnetic Energy using electromagnets, and converting that kinetic energy to Mechanical Energy using the crankshaft. The Electromagnetic Reciprocating Engine can produce various amounts of horsepower and torque.

My design idea is to replace the gasoline motor with Electromagnet (Magnetic) Piston Cylinder Motor and gas tank for battery. Vehicle fuel sale areas could offer a 5/10 minute vehicle charge (pass through charge). The charge would last similar time to gasoline added. This design model can move out further.

I set the Electromagnet (Magnetic) Piston Cylinder Motor as an open patent free to use. Steven D. Jensen (3/10/1997)

"We have built a working motor." 11/17/2018

The design model is open patent FREE to use (1997). This would make a noticeable difference in pollution and resolve a long-term international issue. Maybe we watch a long-term international issue resolved? "It would be gone."

The gasoline motor thrust and torque matches piston combustion force in Newton force.

- [Gasoline engine thrust piston diameter in Newton force](#)
- [Gasoline piston diameter combustion thrust force converted to Newton force for electromagnetics repulsion](#)
- [Torque converted to Newton force](#)
- [Thrust converted to Newton force](#) – Chart for Newton force – 9/30/2021

Metal density controls electric charge time for force $F=MA$ (Newton Force) and electromagnetic for electromagnet repulsion force piston motor electromagnet design. The gasoline motor piston combustion force can be replicated using electromagnetic repulsion. (1996)

- [Metal density electric magnets](#)
- [Metal density electromagnets](#)

Existing automobile services stay intact.

The gasoline motor mean piston speed can also be used to calculate Newton force.

The motor contains an electromagnet that is connected to a shaft. When current flows through the motor, the electromagnet rotates, causing the shaft to rotate as well. ...

When current passes through the electromagnet, it becomes magnetized, and its poles are repelled by the like poles of the permanent magnets.

Electrolytes and polarity pass through charge for battery recharge time (4 hr charge in 5 min).

Low loss to resistance magnet material density improves battery time between charges (see above).

My design the Electromagnet Piston 4 Cylinder (1.5L) Motor had a two to three day of driving time per charge and outperforms electromagnet spindle motor. The Electromagnet Piston Cylinder Motor is open patent, no copyright, and free to use.

This is (was) Avoidable

I changed this police now have access to encrypted phone
records.

Smartphone and iPhone is a car stereo. 11/7/2020

Peer pressure text messaging and group/individual text
messaging is a leading crime tool using a computer phone.

National Satellite Video Coverage

Provide access to national satellite video coverage for law enforcement to back track crimes reported already used in Google Maps.

This change would be unmatched finding missing children. And a lot more too.

- "We will receive access to it. National Satellite Video Coverage for child abduction alert."
9/13/2018

This picture has been digitally modified to block license plate. The license plate is visible for this vehicle and satellite picture can return a picture of the license plate visible. Better the satellite picture can return a visible picture of people. The picture below has been digitally modified to block person's identity.

The Father, "This is attainable." 12/31/2018

U.S. General, "It's starting with child abduction."
3/22/2019

U.S. Federal already has national satellite surveillance video services in place that far exceed Google Maps example pictures above.

Will providing detailed Federal video surveillance to law enforcement resolve 1000's of reported crimes? Yes! Start there. I remember several times public news of crimes reported would have been solved with access to national satellite video coverage.

Police, "We're going to know the next morning what happened."

You just changed life in a really good way. 12/12/2019

I initiated National Satellite Video Coverage

Hoffman Estates, IL police officer, "That is impressive."
2/5/2020

Police, "Well written."

The Father, "They found her." 3/29/2021

Shenyang China Industrial Pollution

China Smog (Shenyang) Reaches 50 times WHO Recommendations

A swathe of China was blanketed with acrid smog Monday after levels of dangerous particulates reached around 50 times World Health Organization maximums, in what environmental campaigners said were the highest figures ever recorded in the country.

Pictures showed smog so thick that buildings in Changchun, the capital of Jilin province in the northeast, were rendered invisible.

One image showed a restaurant's neon sign seemingly floating in mid-air above traffic, proclaiming in yellow: "Eastern Dumpling King".

Levels of PM2.5, the tiny airborne particles considered most harmful to health, reached 860 micrograms per cubic metre in the city of around eight million.

The World Health Organization's recommended maximum is a 24-hour average of 25 micrograms. "Today's haze is pretty severe and choking - when I walked out the door I thought someone's house was on fire," said one poster in Changchun on China's Twitter-like Sina Weibo.

A residential block covered in smog in Shenyang, China's Liaoning province, on November 8, 2015

China's chronic pollution is generally worse in winter, when power consumption -- much of it fuelled by coal -- rises along with demand for heating to combat the bitter cold.

The scourge has been linked to hundreds of thousands of premature deaths, and has become a major source of popular discontent with the government.

PM2.5 particulates can play a role in heart disease, stroke, and lung ailments such as emphysema and cancer.

Their overall levels reached 1,157 micrograms per cubic meter on Sunday in Shenyang, the capital of the neighboring province of Liaoning, data from the city's own environmental protection bureau showed.

They peaked as high as 1,400 in parts of Shenyang according to state broadcaster CCTV, with visibility less than 100 meters.

A billboard photo showing the Beijing skyline on a clear day is pictured in front of some of the same

"As far as we are aware from the data we have been observing over the past few years, this is the highest ever PM2.5 level recording" in the country, Greenpeace campaigner Dong Liansai told AFP.

An image circulating online showed a man biking through snow in Shenyang wearing a vintage-looking gas mask, and the official news agency Xinhua quoted a hospital official in the city saying that his respiratory ward had been overwhelmed, with all its beds full.

Online commentators were furious.

"If heating companies dare to buy cheap, low-quality coal and pollute the environment, they should be discovered and immediately shot," said one poster. - 'Central heating'

Overall levels of PM2.5 particulates reached 1,157 micrograms per cubic metre in Shenyang on Sunday,

Shenyang's apocalyptic smog was caused by coal use from its public heating system and by heavy pollution blown in from other provinces, city environmental authorities said on a verified social media account.

The explanation provoked derision online.

"Sweden also has central heating - why don't they have haze?" asked one poster.

Xinhua blasted the city's emergency response as "useless" in the face of "such severe haze and pollution", which it said was the heaviest of the year.

"Fairyland or doomsday?" quipped Xinhua of the sorry winters capes on its Twitter account.

A residential block obscured by smog in Changchun, in northeast China's Jilin province, on Novem

Calls made to the environmental protection bureau in Shenyang, where more than eight million people live, went unanswered.

The Changchun city government said on social media Monday that it was initiating a "level three" emergency response, telling schools to stop organising outdoor activities, and reminding residents to stay indoors and "take health precautions", without further specifications.

China used almost 4.3 billion tonnes of coal in 2013, according to the latest official statistics -- in which figures for previous years were revised upwards by hundreds of millions of tonnes.

Beijing has pledged that its Emission of carbon dioxide, the primary greenhouse gas pollutant released from the burning of coal, will peak by "around 2030".

Northeastern provinces such as Jilin and Liaoning do not yet have a coal consumption cap, Greenpeace campaigner Dong said, describing it as "a measure which can rapidly improve air quality"

Last month, the environmental group found that nearly 80 percent of Chinese cities had pollution levels that "greatly exceeded" national standards over the first nine months of this year.

Yet online commentators expressed concerns that governmental attempts to clean up the air would be too little, too late.

"It's like this every year," was a common refrain.

One user wrote: "Environmental pollution has made chronic diseases more and more common; we're becoming the sick man of Asia of the new century."

Shocking images show air pollution in China is so suffocating severe that residents are forced to wear GAS MASKS - 2015 and moving

"OMG, look what's coming through right now." 6/16/2019

Thunder Detonation 7/18/2019

Phone call from Chinese Consulate General 9/19/ 2019
5.19 pm

I was greeted by a group of Chinese men in Rockford, IL. I received a duplicate voice mail at the same time. I was told would receive a written certificate gift.

I warned 100's about Shenyang China Industrial Pollution.
5/10/2019

Thick haze in China could be there for days, authorities warn.

Were detonations being used in pollution area to break up solidified areas and released manufacturing exhaust/debris into the atmosphere to clean area?

The summer of 2019 was nonstop rain and thick dark clouds in the sky. This is when today 10/17/2020 started.

This is not a WHY. This is a NOW. NOW means technology solution clean the area and add filtration tools.

Start closure

The manufacturing exhaust area above ground level has solidified, which means the exhaust area has hardened and remove using cutting blade and cut into small sections remove and bury in the deep hole in the manufacturing area without transporting material. Manufacturing exhaust filtration installed to prevent future occurrences and manufacturing process continues.

Have industrial pollution manufacturing areas started to shut down to install filtration equipment?

The landscape in China's manufacturing areas looked like an apocalyptic scene. The landscape looked like black soil.

Asian girl, "We're just waiting for someone to help us."
6/30/2019

She was crying

You should be getting some help. Let's clean it up.
7/1/2019

We share your tears.

Jezebel, "Bring everyone into a moment of calmness."
7/1/2019

- China cleans solidified pollution areas and COVID 19/Coronavirus contaminated areas will be contained. 11/28/2021
- China's cleaning it up. I learned that Sunday night 12/5/2021.

From with Jezebel, "We express our sincere remember."
7/7/2019

- We prayed together.

Jezebel, "He just changed the weather." 7/11/2019

- Thunder Detonation 7/18/2019

Police confirmed today never heard the term Thunder Detonation and confirmed hearing a load explosion in the sky 7/18/19 and confirmed hearing NON STOP Thunder Detonations 6/7/2021.

We ask for international assistance to help clean and recover the areas.

The detonations have stopped in the solidified areas.
7/18/2019

Have industrial pollution manufacturing areas started to install filtration equipment?

Proof of fully vaccinated against COVID-19 for schools, sports, music shows, movies, traveling, public and private services and events, and more. 5/1/2021

Americans who have been fully vaccinated against Covid-19 will be able to visit the European Union this summer, Ursula von der Leyen, president of the European Commission, said in an interview with The New York Times on Sunday 4/25/2021.

NON STOP Thunder Detonations 6/7/2021

NON STOP Thunder Detonations

Jezebel, "He just changed the weather." 7/11/2019

7/18/2019, I was at Amoco fuel East State St. and Bell School Rd. Rockford, IL a thunder detonation reaction occurred.

The sound was so loud matched a 10 ton bomb detonating in the sky.

NOW if we could have recorded the sound, and use as a concert opening kickoff would be BAD ASS!

NON STOP Thunder Detonations, Rockford, IL 6/7/2021.

Police confirmed today never heard the term Thunder Detonation. Thursday morning 7/18/19 police confirmed hearing a load detonation in the sky (Thunder Detonation 7/18/2019) and confirmed hearing NON STOP Thunder Detonations 6/7/2021.

CHINA IS NOW USING VIRTUAL MILITARY PLANNING 10/27/2021

GPS Satellite Speedometer

I talked to the police in 2012 in Algonquin and asked is there a mechanism available today for Car GPS Satellite Speedometer with Transmitter/Recorder for Traffic Court assigned by the court for speeding violators? He answered, "Assigned by the court, not that I am aware of."

I suggested the court assign Car GPS Satellite Speedometer with Transmitter/Recorder for Traffic Court to excessive speeders AND/OR repeat offenders and driving records recorded by satellite. GPS positioning and speedometer for speed limits returned completed to the state's attorney office for review of court case status. The officer said, "I like that idea!"

This is not a GPS Speedometer. This tool tracks location and cross references to roadway speed limits. There are also speedometer methods that can be combined with speed limit tracking.

I publish this design model name for a review, and maybe a few a lot of court member's will read about this traffic control idea.

My design idea is available for public court use to improve road way driving safety. Intellectual Designer for Car GPS Satellite Speedometer with Transmitter/Recorder for Traffic Court and Name © Steven D. Jensen
